What is ScriptSaver?

ScriptSaver is a prescription savings program that offers reduced prices on the largest assortment of prescription drugs. By lowering the retail price of pharmaceuticals, ScriptSaver provides much-needed relief for anyone struggling with high healthcare costs today.

Will ScriptSaver really save me money?

Absolutely. ScriptSaver offers significant savings for all cardholders—patients without insurance, patients with coverage that doesn't include their prescribed medications, and patients who exceed their coverage limits. Regardless of the reason, if you're paying out-of-pocket for your prescriptions, ScriptSaver will save you money.

Does ScriptSaver offer benefits not available through other drug discount programs?

Yes! What makes ScriptSaver so unique is its coverage: while many pharmacy discount programs offer reduced prices on a few hundred generic medications, ScriptSaver lowers prices on thousands of prescription drugs, including many of the most commonly prescribed generics, maintenance medications and brand name drugs. No other pharmacy savings program, large or small, can surpass the coverage offered by ScriptSaver.

How do I sign up?

Complete the attached enrollment form and submit it to the pharmacy to receive your ScriptSaver membership card. Present your card whenever you have a prescription filled at our pharmacy to receive the premium service and special pricing available through the program. *

* See pharmacy staff for details.
